

# EXANTAS®

## The Courier Software Engine

*It meets uniquely the needs of any courier company*

- It has been designed by people dedicated into the courier business for the last 15 years.
- It is a comprehensive suite of systems that work together seamlessly
- It uses the latest technologies to expedite the development process and to ensure quality.
- It has, as standard, a powerful *multilingual user interface*.
- It automates the front office, back-end business and in-field courier processes.
- It offers on-line customer access for orders and waybill preparation.
- It offers real-time delivery tracking and general accounting info.
- It offers real-time Email and/or SMS notification on selected operations.
- It produces a variety of MIS comprehensive reports
